Cranberry (Vaccinium macrocarpon)

Cranberry extract **HI-PACTM** is a spray-dried cranberry concentrate powder standardized to a minimum of 90% cranberry fruit solids and 35% organic acids (9% quinic acid typical). HI-PACTM is 100% water soluble and contains unique proanthocyanidins or condensed tannins, which have been identified as the active component responsible for inhibiting the adhesion of certain bacteria to cell walls.

HI-PACTM cranberry powder supports urinary tract health and offers a convenient low-calorie alternative to cranberry juice beverages.
