

VesiSorb

**Advanced drug
delivery product**

What is VesiSorb?

VesiSorb® Q10 is a revolutionary preparation containing faster and more effectively absorbable form on coenzyme Q10 that helps production of energy therefore better operation of all organs in body.

Higher absorbancy is given by a clinically proven Swiss technology VesiSorb®, thanks to which nano-particle size droplets of Q10 coenzyme are created in the alimentary tract. Nano-particles of Q10 compared to ordinary coenzymes pass the enteric barrier and get into the entire organism faster in highly effective amount.

„More energy for the whole organism“

What does VesiSorb contain?

Each capsule contains	weight/ 1 cap.
Coenzyme Q10 Ubichinon VesiSorb	30,0 mg

Dosage: 1-2 capsules a day, to take during meals or after meals,
wash down with liquid

„3 – 6 times higher absorbability“

What effects has VesiSorb?

- **positively influences performance of the whole organism and therefore physical activity**
- **helps maintain healthy physical and psychical condition**
- **supports energy production**
- **helps protect against free radicals that are responsible for cells aging and therefore helps to slow down aging**
- **useful for gums bleeding and parodontosis**

„Patented Switzerland technology“

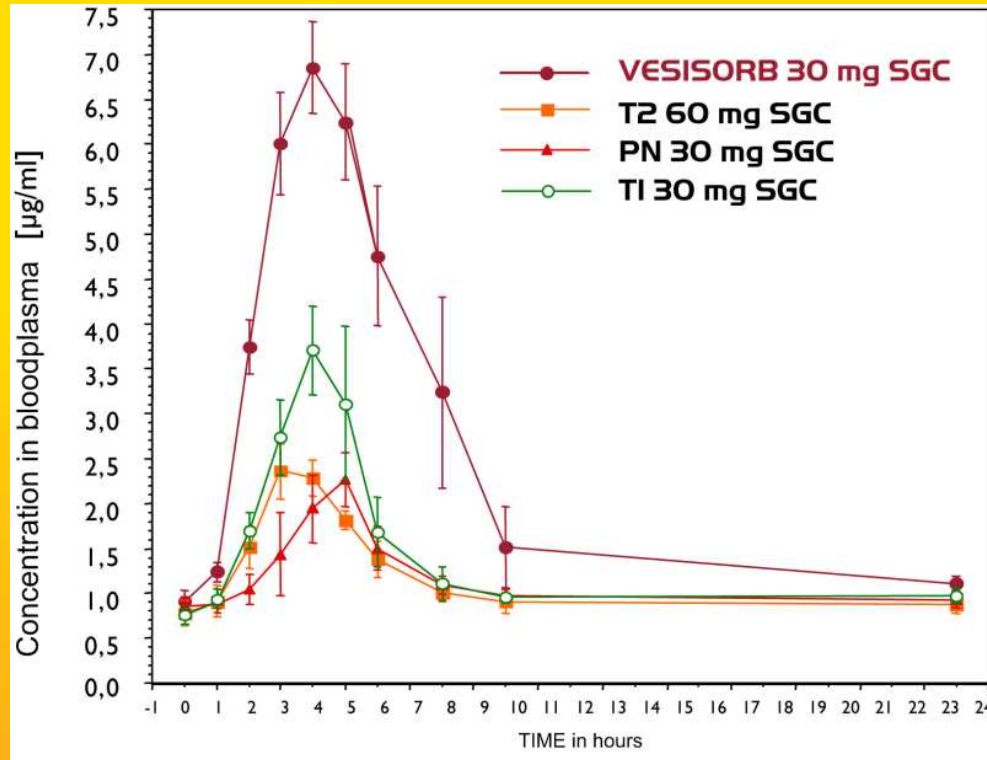

Why is Vesisorb unique?

- ✓ For Vesisorb production is used clinically proven patented technology = 3-6 times higher absorbance in the human organism than standard technology coenzymes
- ✓ Absorb rate of Vesisorb isn't influenced by meal eaten before taking
- ✓ Vesisorb production technology is patented
- ✓ Vesisorb is produced and tested in production certified by GMP Pharmaceutical licence

„More energy for the whole organism“

3 – 6 times higher absorbability

Double blind, controlled comparative study results:

Samples T1, T2 – preparations from the American market claiming that they have much higher absorbability than any other coenzyme on the market

Sample PN – the most sold coenzyme in Europe (Pharma Nord, standard oil suspension)

The study includes plasmatic values and pharmacokinetic profile after 24h. The study was carried out on the clinical university in Munich, Germany.

„GMP certified production“

Who is VesiSorb suitable for?

- for people with higher physical or mental strain (in stress)
- with total organism tiredness
- medium and higher age categories
- convalescents
- long term illnesses
- sportsmen – immediate intake of energy, elimination of tiredness
- people with gum illnesses and paradentosis
- people who are on statin drugs – when treating hypercholesterolemia the level of coenzyme in body is lowered by 20 – 51%
- for people with cardiovascular illness (angina pectoris), CHF (congestive heart failure), hypertension, after heart stroke and operation states)

„More energy for the whole organism“

More than common
Coenzyme Q10.
